Controls Technician Position

The Reliable Controls dealer network is currently seeking skilled Controls Technicians throughout North America and the world. The experienced candidates will be responsible for the servicing, commissioning and troubleshooting of environmental control systems and providing product support to customers.

Duties and Responsibilities:

- Perform service, start-ups, repairs, and trouble-shoot building environment control systems
- Performs preventative maintenance service as part of service agreements, periodic inspections, replacement, and modifications as needed or requested by customers
- Keeps current on all products concerning installation, operation, maintenance, service, and repair
- Provides technical support and basic training to customers
- Available for occasional after hours and weekend shifts for after hours service
- Travel to customer job sites is required

Qualifications:

- Ideally technologists diploma in Electronics, Process Control, Building Automation or equivalent
- Minimum 3 years experience working with building automation systems
- Familiarity with basic programming requirements for DDC systems
- Able to interpret blueprints, engineering specifications, project plans or other technical documents
- Good working knowledge of the operation, installation and servicing of peripheral devices
- Troubleshooting and problem solving skills; able to diagnose problems and implement cost-effective solutions
- Demonstrate commitment to excellence in customer service
- Able to work with minimal supervision

If you interested in the above position, we want to hear from you. You can submit your covering letter and resume to: info@reliablecontrols.com
