

PRESS RELEASE

March 23, 2015

BACnet[®] Interest Group Europe

The BACnet Interest Group Europe welcomes Reliable Controls[®] as a new member.

Victoria, BC, Canada – Reliable Controls is pleased to announce its membership in the BACnet Interest Group Europe (BIG-EU).

The BIG-EU is the European trade association for the application of the global BACnet standard ISO 16484-5. BACnet is the only vendor-independent communication protocol that is specifically designed for building automation.

This new membership was announced by the BIG-EU in March 2015, welcoming Reliable Controls and proclaiming the company's way to global interoperability.

Objectives of the BIG-EU include:

- Promoting the spread of best practice solutions
- Coordinating the European BACnet activities and globally representing the interest of European members
- Ensuring interoperability of different building

automation components

- Certifying conformance according to the BACnet standard ISO 16484-5
- Contributing to guidelines, and providing unbiased marketing
- Training, focusing on fundamentals and methodology of planning, implementation, and operation
- Enabling open data exchange

The group demands prevalence of the BACnet standard in Europe because systems that communicate with each other in a single language are far superior to isolated solutions. The BIG-EU represents European interests in the development of the norm and coordinates the European BACnet activities. Reliable Controls launched a European Authorized Dealer Network in March 2014.
