Reliable Controls Partners with DAQ Electronics

Reliable Controls is pleased to announce a private-label distribution partnership with DAQ Electronics.

Victoria, BC, Canada – Reliable Controls Corporation is pleased to announce a new private-label distribution partnership between Reliable Controls and DAQ Electronics.

This partnership will enable the Reliable Controls Authorized Dealer network to expand into the security systems market using Reliable Controls branded door access controllers and security management software. The firmware in the door controllers was developed by DAQ with assistance from Reliable Controls, and will be unique for the private label brand. Additionally, Reliable Controls will offer a line of commonly used security peripheral products.

DAQ Electronics is a leader in the field of high-speed electronic automation, serving applications in both the physical security and SCADA markets. Their security technology provides state-of-the-art solutions for access control and intrusion detection and has been installed in some of the most secure locations in the world. DAQ Electronics plays a key role in enhancing industrial infrastructure and improving security.

The relationship between Reliable Controls and DAQ Electronics is unique in that the Reliable Controls Authorized Dealer network will benefit from a 5-year warranty on the private-labeled DAQ manufactured hardware products.

The mission and values of both companies align well, with a focus on customer service and delivering practical, easy-to-use building solutions that are flexible, economical, and an excellent return on investment, year over year.

Reliable Controls is pleased to expand the MACH-System™ product line into the security market and looks forward to a productive partnership with DAQ Electronics.
