September 8, 2017

Reliable Controls ISO 9001/14001:2015 Certified

Reliable Controls is pleased to announce ISO 9001/14001:2015 certification.

Victoria, BC, Canada – Reliable Controls is pleased to announce that after auditing by the ISO registrar, SAI Global, the company has successfully achieved formal certification to the new 2015 version of the ISO 9001/14001 standard.

ISO 9001 has become the most widely recognized Management System Standard in the world. The implementation of the new 2015 standard provides businesses with the opportunity to adopt a more holistic approach to managing business and customer satisfaction.

ISO 14001 is an environmental standard developed through dedicated technical committees representing approximately 150 countries around the world. Its purpose is to enable an organization of any type or size to adopt policies committing to the prevention of pollution, compliance with legal requirements, and continual improvement. The realization of this commitment is a management system that recognizes primary environmental issues, including product life cycle and environmental aspects.

These commitments encompass awareness and assessment of applicable legal requirements, objectives

for improvement, assignment of responsibilities, competent personnel, communications, procedures, controls and monitoring, emergency response capability, self-correction and assessment, and internal reviews.

These 2015 certifications demonstrate a commitment to having an effective, internationally recognized quality and environmental management system and ensures the company's quality standards are met while making Reliable Controls Authorized Dealers more competitive in the global market.
