Reliable Controls Appoints Levi Tully as Executive Vice President, Sales

Victoria, BC, Canada – Reliable Controls is pleased to announce the appointment of Levi Tully, LEED AP BD+C, PMP, CLCP, to the position of Executive Vice President, Sales.

On January 2, 2020, Levi will move from his current position as Manager of Application Engineering to take on new responsibilities as EVP of Sales, where he will inspire sales teams in their important goal of cultivating the excellence of Reliable Controls Authorized Dealer locations around the world.

“I am honored to work alongside the outstanding people that make up the Reliable Controls team and the Reliable Controls Authorized Dealer network,” Levi said. “It’s a special opportunity to work with an organization that prioritizes environmental stewardship and the health and welfare of people in the built environment.”

Levi is a strong and vocal advocate of the Reliable Controls mission to earn and sustain the reputation of having the most satisfied customers in the building automation industry. He is a voting member of ASHRAE Guideline Project Committee 36, which provides valuable advocacy on the development of high-performing sequences of operation for HVAC, and a member of the Project Management Institute.

After joining Reliable Controls in 2008 as the company’s first dedicated DDC Instructor/

Application Engineer in the United States, Levi was quick to demonstrate his knowledge and experience in facility automation engineering, programming, and project management. In his later position as Manager of Application Engineering, Levi positively impacted the Reliable Controls Authorized Dealer network with his passionate, team-spirited approach and the development of an array of valuable documents and services.

Reliable Controls has been very fortunate to have had Levi in his training and application engineering roles. He is a highly regarded figure in the organization who consistently promotes the company’s value proposition in key sales meetings and efforts.

Reliable Controls is a worldwide leader in building automation and controls, with over 200 factory-certified partners in more than 35 countries and a LEED Platinum-certified corporate office and manufacturing facility in Victoria, Canada.
