

PRESS RELEASE

June 25, 2019

ENGINEERS &
GEOSCIENTISTS
BRITISH COLUMBIA**ACCREDITED EMPLOYER
MEMBER-IN-TRAINING
CERTIFIED****Reliable Controls® is now an Accredited Employer
for Engineers in Training**

Victoria, BC, Canada – Reliable Controls® has become the first manufacturing-based and software/hardware-related organization certified as an Accredited Employer as part of Engineers and Geoscientists BC's Member-in-Training (MIT) Program.

As an Accredited Employer, Reliable Controls is now able provide their engineers-in-training (EITs) with a training program that facilitates an expedited pathway to professional engineer (P.Eng.) designation.

To achieve accreditation, Reliable Controls, in collaboration with Engineers and Geoscientists BC, developed an in-house training program that provides EITs with the necessary experience that satisfies the requirements of the competency-based assessment for professional licensure.

"The program raises our research and development profile and sets us as an industry leader in professional practice, professional development, and technical training."

- Faisal Hamood, P.Eng.
Product Owner

Furthermore, this certification will not only benefit the organization's current employees, but also help

Contact: Reliable Controls

About Engineers and Geoscientists BC

Engineers and Geoscientists British Columbia is the business name of the Association of Professional Engineers and Geoscientists of the Province of British Columbia. Engineers and Geoscientists BC regulates and governs these professions under the authority of the Engineers and Geoscientists Act.

The association is charged with protecting the public interest by setting and maintaining high academic, experience, and professional practice standards for all 34,000 current members. Individuals licensed by Engineers and Geoscientists BC are the only persons permitted by law to undertake and assume responsibility for engineering and geoscience projects in BC.
