NEW BTL LISTINGS

Expanding our commitment to BACnet

Reliable Controls® is very pleased to announce that the MACH1™, MACH2™, and MACH-Vision™ have been officially added to the BTL listings. Our latest BTL listings join the MACH-Air™ and MACH-Zone™ which were listed in September of 2003. The MACH-Global™ controller and ETHER-Link™ portal are expected to gain BTL listing by Q3 of 2005.

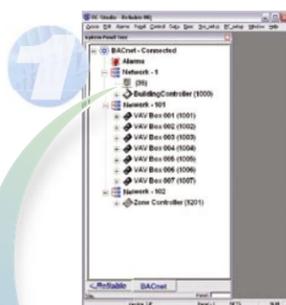

All controllers meet or exceed the BACnet Application Specific Controller profile.

All Reliable Controls® products support BACnet® and Reliable Controls® protocols. Each controller in the Reliable Controls® MACH-System™ supports at least one MS/TP port which allows the device to reside on any BACnet® twisted pair network.

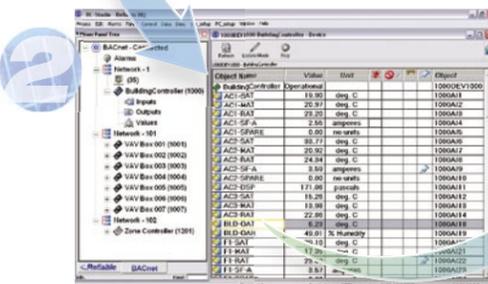

By using RC-Studio® 2.0, building operators can quickly discover and display all BACnet® networks and devices, then drag and drop BACnet® objects to graphics and control programs.

BACnet Manufacturer	B-OWS	B-BC	B-AAC	B-ASC	B-SA	B-SS
ABB						
Alstom						
Andover Controls						
Automated Logic Corporation						
Delta Controls						
FieldElectrix Technologies						
Honeywell/Kontron						
EMC Controls						
Lithonia Lighting						
Reliable Controls Corporation	✓	✓	✓	✓		
Siemens Building Technologies						
Teletrol						

Open the BACnet® System Tree browser.

Browse for the desired BACnet® object.

Drag and drop the object to the graphic user interface (GUI).

Reliable Controls® continues to be an active member of the BACnet Manufacturers Association, participating in both the BACnet Testing Labs Working Group (BTL-WG) and the Marketing Committee. Roland Laird is an active member with the BTL-WG which is responsible for developing the test standard which must be met by BTL listed products. As President and VP of R&D for Reliable Controls®, Roland ensures that all Reliable's products are designed to meet or exceed the BTL test standard.

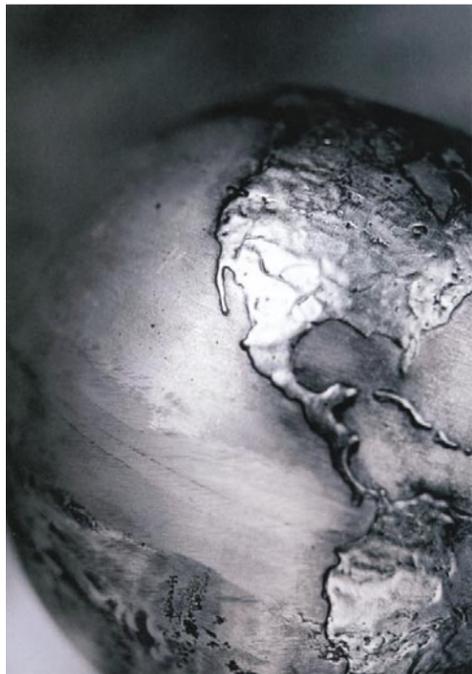

This new marketing tool communicates the simplicity designed into the Reliable Controls® BACnet® solution.

BTL vs BMA

Kent Gorrie represents Reliable Controls® on the Marketing Committee and is involved with the planning of an increased BACnet® marketing program. In particular, Kent will be lending his experience in web marketing to help promote BACnet®.

A new promotional brochure is now available from Reliable Controls® to assist in marketing BACnet®. A downloadable version of the brochure can be found on the Reliable website.

The BACnet Testing Laboratories (BTL) are a branch of the BACnet Manufacturers Association (BMA). The BMA offers a product testing and listing program for products that have BACnet capability. The BTL's authorized test laboratories test the BACnet functionality of a product to a set of requirements developed by the BTL that are based on ASHRAE Standard 135.1. A product must meet the BTL's mandatory requirements to be eligible for BTL listing.

AHR EXPO 2005

Reliable @ AHR Expo

The 2005 AHR Expo® saw solid representation from around the globe, including 34 companies from Europe, 86 from Pacific Rim nations, and 123 Canadian companies, including the well received contingent from Reliable Controls®.

Celebrating its 75th anniversary, the AHR Expo® was held in Orlando, Florida, and as anticipated, it attracted a large number of industry professionals from around the globe. According to show management, the 2005 AHR Expo® set a new record for the number of exhibiting companies with 1,871 exhibitors taking up 372,955 square feet of exhibit space. The AHR Expo® was also one of the biggest shows in the Southeastern US in total attendance, with more than 45,000 attendees (over 27,000 visitors and 18,000 exhibitor personnel).

Reliable Controls® participated in technical and business meetings as well as promoted the company and showed the SMART-Sensor™ LCD, and demonstrated the new RC-Studio® 2.0 software features such as the BACnet® Tree and animation. An enhanced version of RC-WebView™ was shown with demonstrations focusing on new features such as the audit trail, and the new line of SPACE-Sensor™ Temperatures (SST). Numerous contacts were made from around the globe.

Reliable Controls® also hosted a very successful Hospitality for the dealers and customers at the Rosen Center Hotel. Prior to the 2005 AHR Expo®, the SMART-Sensor™ LCD was singled out by a panel of 6 judges for Honorable Mention in the AHR Expo® Innovation Award Competition in the Building Automation category. As a result of the reward, the SMART-Sensor™ LCD was promoted in a special section of the 2005 AHR Expo®.

EASTERN US

After the 2005 AHR Expo® in Orlando, Florida, Reliable Controls® hosted the 2005 Eastern US Dealer Meeting at the Rosen Hotel. Along with presentations, discussions, and a golf outing, Dealer Achievement in 2004 was recognized.

The *Top Sales of the Year* was awarded to **Building Automation Services** in recognition and appreciation of their highest sales contribution in the region. BAS is a highly organized design and service company that focuses exclusively on the installment of BACnet® based projects. The elevated level of efficiency within the company paved the way to their outstanding year of sales in 2004.

The *Entrepreneur of the Year* was awarded to **Advanced Energy Controls** in recognition and appreciation of their sustained new growth in the region. Advanced Energy Control (AEC) has positioned themselves as an industrial controls company with a nationwide focus on industrial and commercial firms. AEC's expertise is largely in ammonia and freon refrigeration control, food process control, water distribution control, and hvac / building management systems. AEC's control experience has allowed their clients to save significant money on energy.

The *MVP of the Year* was awarded to **Cornerstone Automation** in recognition and appreciation of their excellence achieved in all aspects of business. Cornerstone Automation is a collaboration of Service, Controls, Engineering and Sales Experts. Their well rounded experience enables them to offer services to most facilities; including system design, integration, service and re-designing of less efficient systems.

"we're seeing the people we need to see from all corners of the globe - from engineers to end users."

RELIABLE UPDATES

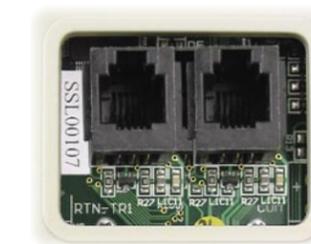

SMART-Sensor™ LCD

As a result of a good suggestion from a customer, the SMART-Sensor™ LCD (SSL) has been updated to include 2 RJ-11 plugs on the back plate. This new improvement will eliminate the need for duplex plugs and allows for more efficient daisy-chaining. Q1 of 2005 also saw the official release of the SSL I/O model. The SSL I/O features 2 Thermistor/Dry Contact Inputs and 2 Triac Outputs with 500 mA current per Triac.

The SMART-Sensor™ LCD Humidity is currently in testing. The Research & Development branch of Reliable Controls® is focused on evaluating humidity sensors for the SSL Humidity.

SPACE-Sensor™ Temperature™

The SPACE-Sensor™ Temperature (SST) line of products has been recently released. The SSTs are attractive, executive-style sensors designed to complement SMART-Sensor™ LCD installations. Current research is examining the possibility of adding sensors for Humidity, Occupancy, and CO2 for release later this year.

X-PORT CONVERTER

When using the X-Port converter, it is critical that the panel ground and the PC ground are the same potential. If you are unsure of the grounding, use a laptop on battery power.

DOUBLE-CLICKING COLUMN TITLES

In RC-Studio 2.0®, double-clicking a column title with an underline (*Job Directory* in the System List, *Range* in the I/O worksheets, *Unit* in the Vars worksheet, and *Graphic* in the System Groups) opens a browser to select a filename or range/unit. This handy feature allows the user to make a selection entirely with the mouse – no need to type a name – this is particularly useful when adding a job directory to the Systems List, or searching for a graphic to place in a System Group.

CUSTOMER TRAINING

If you are interested in attending a leader-lead training session, please visit...

for class listings, locations, and dates.

RC-STUDIO® 2.0 UPDATE

An update to RC-Studio® 2.0 will be available in Q2 of 2005.

The updated RC-Studio® 2.0 will feature BACnet® schedules and alarms. The update will also reflect interface refinements that will resemble Windows Office Suite 2003.
