

New Business Development Executive Sean Roukey to represent Reliable Controls in the northeastern United States

Victoria, Canada—Sean Roukey has joined the Reliable Controls team as Business Development Executive for the northeastern United States. In this role Sean will work closely with [Reliable Controls Authorized Dealers](#) across the region, empowering them to succeed in their commitment to business excellence in the building controls industry.

“Throughout my career I’ve had the pleasure of helping customers address their most pressing challenges and achieve their goals using technology and sustainable solutions,” says Sean. “I believe technology is the key driver to creating a better built environment and that smart buildings will fundamentally improve the way we live and work.”

Sean has more than 15 years of experience in the building automation sector, including previous roles as a technician and in sales, sales engineering, project management, and field operations with companies like Honeywell and Siemens. His building automation expertise in the health care and education markets gives him a comprehensive understanding of the issues and opportunities in these critical industries.

Sean is a member of [ASHRAE](#), the [New England Healthcare Engineers’ Society](#), [APPA](#), the [American Society for Health Care Engineering](#), and the [Association of School Business Officials](#). Outside work he enjoys spending time with his family in the foothills of the New Hampshire White Mountains.

Reliable Controls is a worldwide leader in [simple, flexible, sustainable building automation solutions](#). With a people-first approach, the company is committed to helping building owners and operators achieve their indoor environmental quality, energy efficiency, and operational goals.
