

# Transforming facility management: Reliable Controls releases RC-WebView 3.16 for enhanced building automation

Victoria, Canada—It's easier than ever for building managers to control facility operations with the release of [RC-WebView®](#) version 3.16, a browser-based building management software solution from Reliable Controls.

With RC-WebView, facility managers can connect multiple independent building control systems into a single enterprise website that empowers them with scalable control over energy efficiency using a single point of access. The benefits of enterprise automation are significant, including stronger cybersecurity, optimized operational efficiency, shortened issue response time, improved management processes, easy scalability, and cleaner building data.

## New features in RC-WebView 3.16

- Protocol options for BACnet Secure Network and BACnet Secure Connect
- A manual points report that updates with live values
- Easy copying of Navigation Groups
- Added security with the ability to set advanced user password requirements
- Support for the Reliable Controls [RC-FLEXone® controller](#)
- Live mode for viewing trend logs
- Optimized load time for graphic groups, trend logs, and alarm animations
- Improved health monitor performance
- Inclusion of SQL Server 2022 Express with installer

"We introduced significant performance and stability improvements in RC-WebView 3.16," says Robert Prinz, Product Owner at Reliable Controls. "The difference between loading trend logs in earlier versions of RC-WebView versus 3.16 is significant—and more stable. Customers are happy with that change. That's just one notable example."

Reliable Controls is a worldwide leader in building automation and controls, with [over 200 factory-certified partners](#) in more than 40 countries and a [LEED Platinum-](#) and [ISO-certified](#) corporate office and manufacturing facility in Victoria, Canada.
