

PRESS RELEASE

April 10, 2015

Customized Mobile Apps

Configured by a Reliable Controls[®] Authorized Dealer, the myControl[®] mobile app offers fully customized mobile interfaces to any Reliable Controls MACH-System™.

Victoria, BC, Canada – Reliable Controls is pleased to announce the release of myControl[®], a fully customized, mobile interface for the MACH-System™. This app is compatible with both Android and iOS operating systems, and can be downloaded from either the Google Play Store or Apple App Store.

The myControl user interface provides individual personal control for occupants through accessible settings for occupancy, temperature, lighting, ventilation, and more. Having personal access offers user empowerment and accountability, as well as the potential for additional energy savings.

Encompassing three different views, any MACH-System control point can be monitored and adjusted using this hotly anticipated app. Features include:

- Configuring of multiple groups of points using any mix of the three currently available views

- Backwards compatible with any MACH-System that includes an Ethernet-connected MACH-ProWeb™ controller
- STATview, which provides a programmable thermostat interface, allowing users to monitor and control the operation of HVAC equipment
- LISTview, which provides a custom list of up to 12 system points that an occupant or operator can quickly view and adjust
- SPACEview, which provides an intuitive interface for occupants to adjust environmental conditions in their space

The myControl app allows occupants to dynamically adjust their individual comfort settings while providing owners and operators with the energy savings they require to run an efficient facility.
