Reliable Controls Corporation

is a privately held corporation that designs, develops, and manufactures Internet-connected building controls. The products we manufacture are used to monitor and control the energy of mechanical and electrical equipment found in every kind of building.

Our worldwide distribution network is eagerly looking to employ individuals with experience in the following disciplines: business management, sales, engineering, estimating, construction supervision, DDC programming, controls commissioning and graphic design.

With the world focussing its attention on energy efficiency and sustainability, now would be a great time to make a career move into the Intelligent Building Automation industry.

Seize the exciting opportunities in our steadily expanding Authorized Dealer network. Visit our website and send your cover letter and resume to any of the Authorized Dealers listed on the sales locator map.
