Project Profile

Insurance Australia Group

Sydney, NSW, Australia

People and Technology

The new operational headquarters for Insurance Australia Group (IAG) is an eight-storey office building in Greater Sydney. The 4.5 Star NABERS project consists of 14,000 square metres of Grade-A office space with five retail areas on the ground floor.

Project Details

The Reliable Controls® MACH-System installed on the project was originally supposed to help earn the building a coveted Green Star 5 star energy rating. However, as the project progressed, the building’s tenants, Insurance Australia Group, believed that the system’s versatility could also allow for a 4.5 Star NABERS rating as well.

Reliable Controls® Authorized Dealer, Rega Controls, used the BACnet® capabilities of the MACH-Global™ and MACH-ProSys™ controllers along with the versatility of the MODBUS-Link™ and ETHER-Link™ portals to connect third-party equipment and achieve the building’s goal of certifiable energy savings.

The customer is very happy with the controls system performance and their energy savings.
